ABOUT ME

Computer Science graduate and Game Developer with a growing focus on player experience, gameplay design, and interactive systems. My work spans combat and physics-driven mechanics, goal-oriented AI, VR interaction, and procedural level design in Unity, alongside a research background in AI-based media analysis. What draws me to game design is the question behind each system, how a control scheme, an AI behavior, or a level layout shapes the way a player feels while playing. I'm applying to REPLAY to move from building mechanics independently toward designing meaningful play experiences collaboratively, grounded in critical reflection and research.

EDUCATION AND TRAINING

BS Computer Science

PMAS Arid Agriculture University Rawalpindi [01/10/2021 – 08/06/2025]

City: Rawalpindi | Country: Pakistan | Website: <https://uaar.edu.pk/> | Level in EQF: EQF level 6 | Thesis: AI-based Deep-fake Detection with sentimental analysis in videos

Final Year Project (Thesis):

- A multimodal deep learning pipeline combining video forensic detection with NLP sentiment analysis, developing research skills in analysing how manipulated media affects audience perception, directly relevant to REPLAY's focus on emerging media, interactive storytelling, and the societal impact of games.
- **Relevant Coursework:** Game Development, Computer Graphics, Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Object-Oriented Programming, Database Systems

WORK EXPERIENCE

🏢 *Plasma It Solutions* – Islamabad, Pakistan

Junior Game Developer

[04/06/2025 – 11/07/2026]

- Designed and tuned flight controls and aerodynamic movement in Unity.
- Designed multiple playable levels, shaping 3D space and mission pacing.
- Diagnosed performance bottlenecks with Unity Profiler, applied optimization strategies.
- Play-tested and iterated on gameplay systems to improve responsiveness and feel.

🏢 *Veeivs* – Islamabad, Pakistan

Game Developer Intern

[01/10/2025 – 30/12/2025]

- Designed modular weapon systems with rotation, firing, and cooldown feedback.
- Programmed context-aware enemy behaviors using finite state machines for combat.
- Built chunk-based 3D environments, structuring space for exploration and scene flow.
- Optimized gameplay systems with Unity Profiler, improving open-world performance by 30%.

PROJECTS

Projects

Mars Vanguard *(Unity 3D, C#)*

Designed a 3D space shooter with wave-based combat, tuning enemy spawn timing and player mobility to balance challenge and flow.

Furious Racer *(Unity 3D, C#)*

Designed an arcade racer with physics-driven quad bike handling, balancing responsive control against grounded terrain feedback.

Atiana Roblox *(Unity 3D, C#)*

Designed a third-person action-adventure prototype with custom character mechanics and Roblox-inspired modular environment systems.

Superb Performer *(Unity 3D, C#)*

Designed a Mario-style 2D platformer with collectible coins and enemy hazards, pacing level layout across a beautified environment toward a clear end goal.

Kachujin Endless Runner *(Unity 3D, C#)*

Designed a Subway Surfers-style endless runner with a procedurally generated track, balancing pacing and difficulty to sustain reactive, moment-to-moment play.

Programming Languages

- **Programming:** C#, C++, Java, Python, JavaScript, Solidity
- **Tools & Engines:** Unity 3D, Unreal Engine (basics), OpenGL, XR Toolkit, Photon PUN, Git
- **Design & Systems:** Gameplay mechanics design, Level design, Game physics, Goal-oriented AI (GOAP), procedural generation, VR interaction design

LANGUAGE SKILLS

Mother tongue(s): Urdu

Other language(s):

English

LISTENING C1 **READING** C1 **WRITING** C1

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1

EXHIBITIONS, GAME JAMS & CREATIVE WORK

Exhibitions, Game Jams & Creative Work

The Burujan Tech ~ Game Design Bootcamp & Game Jam | May 2026

- Completed a 2-hour rapid game development challenge, designing and building a short 3D game in Unity from concept to playable prototype practicing fast iteration, on-the-spot design decisions, and creative problem-solving under time constraint.
- *Certificate ID: GDB-2026-001*

Pakistan Game Developer Conference | June 2025

- Attended sessions on engaging game design and modern development techniques, connecting with the local game development community.

CERTIFICATIONS

[The Burujan Tech, 10/05/2026]

Certificate of Achievement Completed a 2-hour challenge to design and build a minimal, playable 3D game in Unity from concept to completion, practicing fast iteration and design decision-making under time constraint.

Mode of learning: Project based
