Professional Summary

Computer Science graduate and passionate Game Developer with hands-on experience in Unity 3D, VR/AR (XR Toolkit), and C# scripting. Skilled in building optimized gameplay mechanics, immersive 2D/3D environments, and interactive user experiences. Demonstrated ability to integrate AI elements into games and collaborate in team-driven projects. Seeking opportunities in game studios and interactive entertainment companies to contribute creative and technical expertise.

Technical Skills

Game Development: Unity 3D, XR Toolkit, Gameplay Mechanics, Physics, Animations, Level Design, Asset Integration

Programming Languages: C#, C++, JavaScript, Python (basic AI/ML integration)

Web Tools: HTML5, CSS3, React.js, Flask

Databases: SQL, MySQL, MongoDB

Tools & IDEs: Visual Studio, VS Code, Android Studio, NetBeans

Version Control: Git, GitHub

Projects

- **VR Game Environment (Unity, XR Toolkit)** – Designed and implemented an immersive VR experience in Unity 2022 with C#, XR Interaction Toolkit, and MockHMD, enabling headset-free testing and interactive user experiences.
- **RPG Style Game Environment (Core)** – Designed and implemented quest mechanics, AI-driven enemies, and player combat system using C# scripting.
- **2D Grid Arena Game (Unity)** – Developed Grid Battle Arena, a 2D turn-based competitive game in Unity (C#) featuring a 5x5 grid, win/draw detection
- **Shape Shifter Runner (Unity)** – Created a fast-paced reflex game in Unity (C#) featuring shape-shifting mechanics, dynamic obstacles, smooth camera transitions, and puzzle-based interactions.
- **OpenGL Mario Game (C++)** – Implemented core gameplay mechanics including player movement, collision detection, and enemy spawning.

Education

Bachelor of Science in Computer Science | 2021 – 2025

PMAS ARID Agriculture University, Rawalpindi, Pakistan
